Docket # 00P-1211/Cpl

5630 Fishers Ln., Room 1061 (HFA-305) 0017 '01 FEB 27 A11 :56
Rockville, MD 20852

Dear Ms. Henney,

I am writing to ask for your support of the petition by the Center for Food Safety which requests that genetically engineered foods be well tested prior to release onto market and that all products be well and appropriately labeled indicating when their contents contained genetically engineered foods.

There are a number of risks associated with GE foods and I welcome the discussion of these risks and definitive decision making concerning their role in today's world. I am very concerned, however, about the idea that I am not given a choice as to whether or not my family eats such **foods**, and even more concerned that such foods are not regulated or tested by the FDA. I am asking you to support more definitive, specific government management of these products before they go to market, and above all protecting our right to choose which products we eat by requiring proper labeling.

Thank you for your time and consideration.
